ch 40 to create bookmark strip. FO and leave a long tail.

Finishing Touches:

Sew the button to the middle of the area made by the first 6 rows. If you will be using this bookmark with one specific notebook, put the body of the bookmark on the spine, wrap the tail into the book, wind the end around the button and pull tight. Use that "measurement" to tie a loop that can hook onto the button. If this bookmark will be "multiuse" between books, you can just pull the tail tight and wind it back through the book to keep it secure.
